

BLUM COMPACT HINGE.

The Blum 33 self-closing hinge is used on face frame type cabinets and mounts in a 35mm hole in the back of the cabinet door. The hole depth is 1/2in. The bore distance (distance from the edge of the 35mm hole to the edge of the door) is 1/8in for all applications of this hinge. Door opening angle is 110 degrees.

Includes mounting plate.

Opening Angle : 110 degrees.

Please note older versions were made to 120 degrees opening, it is NOT advisable to mix the two options, on the same door.

This hinge was used on Sharpe bedroom furniture.

We have been advised the opposite one to this is NO longer being manufactured, but this will fit and work, although new screw fixing points will be required.
